Students invited to create art for luncheon

Our Stamford Academy students were invited to create works of art for the annual [Fairfield County's Community Foundation Fund for Women & Girls](#) luncheon. Seven girls, whose art was displayed at the event, attended the luncheon as the FCCF's guests and got to see actor [Geena Davis speak on gender bias](#) in the media. The girls were honored to have their art on display and grateful to have the chance to hear Ms. Davis, who they described as "funny and smart." The Fund for Women & Girls has long funded Domus' gender-specific programming like [Girls Circle](#), an evidence-based weekly conversation group that gives girls time and space to talk about thorny life and societal issues like relationships, body image, and issues facing girls today.
